Introduction

The *South Carolina English Language Arts Academic Standards 2007* contains the revised academic standards in English language arts for South Carolina students from kindergarten through English 4. A field review of the first draft of these standards was conducted from September 9, 2006, through October 29, 2006. Feedback from that review has been incorporated into this document. The revised draft was presented to the State Board of Education on December 12, 2006, for first-reading approval.

The South Carolina Department of Education (SCDE), in consultation with Mid-continent Research for Education and Learning, developed these standards and the indicators utilizing a number of resources. Important among them are the English language arts standards documents of several other states as well as the national standards document *Standards for the English Language Arts*, published jointly in 1996 by the National Council of Teachers of English and the International Reading Association. The following publications and resources were also utilized:

- *Media Literacy* (a Web page written by South Carolina media consultant Frank Baker that features descriptions of and links to recommended texts and videos providing background and basic understanding of media literacy)
http://www.frankwbaker.com/media_literacy.htm
- *Reading Framework for the 2009 National Assessment of Educational Progress* (Washington, DC: American Institutes for Research, 2005—prepublication edition)
<http://www.nagb.org/frameworks/fw.html>
- *The State of State English Standards*, by Sandra Stotsky (Washington, DC: Thomas Fordham Foundation, 2005)
<http://www.edexcellence.net/doc/FullReport%5B01-03-05%5D.pdf>
- *Report of the National Reading Panel: Teaching Children to Read: An Evidence-Based Assessment of the Scientific Research Literature on Reading and Its Implications for Reading Instruction* (Washington, DC: National Institute of Child Health and Human Development, 2000)
http://www.nichd.nih.gov/publications/nrp/upload/report_pdf.pdf
- *Understanding University Success* (Eugene, OR: Center for Educational Policy Research, 2003)
http://www.pewtrusts.com/pdf/education_understanding_success.pdf

Procedures for the review and revision of South Carolina standards agreed upon by the SCDE and the EOC were used as the basis for this review of the English language arts standards. These procedures are also used when the academic standards for other subject areas are revised.

South Carolina Academic Standards Documents

Beginning in 2004, the state-approved expectations for student learning will be called *academic standards* instead of *curriculum standards*. In accordance with the South Carolina Education Accountability Act of 1998, the purpose of academic standards is to provide the basis for the development of local curricula and statewide assessments. Consensually determined academic standards describe, for each grade level or high school course, the specific areas of student learning that are considered the most important for proficiency in the discipline at the particular level.

The academic standards in this document are not presented in an instructional sequence. All of the six standards and their indicators carry equal weight and should be taught in an integrated manner. These standards do not prescribe classroom activities, materials, instructional strategies, approaches, or practices—all of which are education components that need to be determined on the basis of the needs of individual students, schools, and districts. **The *South Carolina English Language Arts Academic Standards 2007* is not a curriculum.**

Revised Organization of the English Language Arts Standards Document

The organization of the South Carolina English language arts (ELA) standards document has been modified in several ways:

- The introduction outlines the development of the ELA standards document and explains the guiding principles that support the standards and their indicators.
- Standards are provided for the nine grade levels from kindergarten through grade eight and the four high school–level courses English 1, English 2, English 3, and English 4.
- The standards are no longer organized by strand; however, a heading is used to identify the ELA strand and the objective for each standard. The core information and ideas from each strand in the 2002 ELA standards document have been incorporated into the standards and indicators.
- The number of standards has been significantly reduced. To meet teachers' needs for specificity, each standard has specific indicators that support the standard.
- The standards for each of the nine grades and the four high school courses are prefaced with an overview that provides information concerning the content of those standards and their indicators and describes the process of stages of learning that can be expected at each particular level.
- Clarifying boxes are included at the beginning of each standard and provide additional information which may be helpful to the teacher. Such information may include lists of what students may be asked to read based on the National Assessment of Educational Progress (NAEP), a reference to previously learned material, an indication

of when an Instructional Appendix is available, or an explanation of other research such as that cited in the National Reading Panel report.

- The specific types of literary and informational texts that students should read at each grade level and in the high school courses are listed in a box directly below the standard statement for standards 1 and 2. The types of texts that are named reflect what students may be asked to read on the National Assessment of Educational Progress (NAEP) examination and are based closely on the listings that NAEP provides in the prepublication edition of its document *Reading Framework for the 2009 National Assessment of Educational Progress*. The listings in this South Carolina standards document are not intended to be exhaustive but are intended rather to guide the state's teachers in the selection of a wide variety of texts for their students to read.
- Instructional Appendixes are provided as a baseline for instruction. They are not intended to be all inclusive lists. Teachers should go above and beyond these appendixes, when appropriate, to meet the individual needs of students. Where an appendix is available, a notation is included at the end of an indicator in parentheses.

Instructional appendixes include

- High Frequency Words,
 - Greek and Latin Roots and Affixes
 - Writing Composite Matrix,
 - Suggestions for Reading Materials, and
 - Alignment of Indicator Concepts with Standards
- A glossary is also included as an integral component of the standards. The glossary should be used as the basis for understanding terms included in the standards. Terms included in the glossary are bolded in the text of a standard or indicator.
 - In kindergarten through grade two, the indicators for standard 3 focus on beginning reading skills and strategies and are grouped on the basis of the five central components—phonics, phonemic awareness, vocabulary, comprehension, and fluency—that are delineated by the National Reading Panel in its 2000 report on the teaching of reading. An additional set of indicators for both kindergarten and grade one is grouped under the topic *concepts about print*.

Two sets of indicators in standard 3 for kindergarten are centered in *oral language acquisition* and are separated into the subtopics *vocabulary development* and *comprehension development*. In standard 4 for kindergarten, the indicators are grouped under the topics *oral language expression* and *early writing development*.

In order for teachers to be successful in their instruction of the standards, it is imperative that they have all components of the standards document including

the introductory material, the standards and indicators, the glossary and the instructional appendixes.

ELA Curriculum Support Document

The SCDE will develop a standards support documents after State Board approval of these standards. Local districts, schools, and teachers can use the document to construct a standards-based curriculum, adding or expanding topics they believe are important and organizing the content to fit their students' needs. The support document will include materials and resources such as

- sample units that incorporate literacy elements,
- resources including those accessed through technology, and
- connections to other disciplines.

Definitions of Key Terms

- **Academic standards.** Statements of the most important and consensually determined expectations for student learning in a particular discipline. In South Carolina, ELA standards are provided for the nine levels from kindergarten through grade eight and for the four high school–level courses English 1 through English 4.
- **Indicators.** Specific statements of the cognitive processes and the content knowledge and skills that students must demonstrate in order to meet the particular ELA standard. The main verb in each indicator specifies the particular aspect of the particular cognitive processes that are described in the revised Bloom's taxonomy (see the appendix). Use of the taxonomy will allow teachers to identify the kind of knowledge addressed by an indicator and therefore enable them to teach the content in a more effective manner.

The term *including* appears frequently to indicate the specific items that are intended to focus the teaching and learning of the particular concept. Teachers must focus their instruction on the entire indicator, but they must also be certain to include in their instruction the components specified in the parenthetical *including* statements. Teachers must be aware that state assessments at each grade level may include indicators from the current grade level or course as well as all previous levels.

Statewide Assessments

The English language arts standards and indicators in grades three through eight will be used as the basis for the items on the ELA portion of the Palmetto Achievement Challenge Tests (PACT). The High School Assessment Program (HSAP) is an exit examination and is required for a high school diploma. Therefore, items for the HSAP examination are designed to measure mastery of skills that have been addressed in standards and indicators in grades six through eight and in English 1 through English 4.

as reflected in the 2007 HSAP test blueprint, which can be found on the SDE Web site. Those indicators specific to English 1 will be the basis for the End-of-Course Examination program (EOCEP) test for that course. **Indicators from previous grades may also be assessed at subsequent grade levels.**

Indicators related to media, viewing, and communication are embedded within the standards. They should be addressed through classroom instruction and assessed by the classroom teacher. Though standards including indicators that refer to communication and media literacy are not tested on state assessments, these skills are crucial to the quality of life in the present-day world.

Philosophical Background

The ultimate goal of the ELA academic standards is to teach students the skills and strategies needed to become productive, literate members of our society. Reading, writing, speaking, listening, and viewing are fundamental tools for learning, success in the workplace, and enriching our lives. Language arts instruction in South Carolina provides all students with the opportunity to use language in a lifetime of learning.

Literacy instruction is a continuous process that occupies a prominent position of importance in all K–12 classrooms in South Carolina. In today's increasingly complex world, literacy demands are intensifying and require more advanced levels of proficiency. Students need to become highly skilled, independent users of information in order to become responsible, productive citizens. Our ability to communicate is at the core of the human experience. Language skills are essential tools not only because they serve as the basis for future learning but also because they enhance the lives of students as human beings. Through instruction and immersion in a print-rich environment that includes a variety of literature and informational texts, students may better understand and appreciate the English language and therefore ultimately become proficient communicators.

South Carolina's academic standards for ELA represent what students from kindergarten through high school are expected to know and be able to do as readers, writers, communicators, and researchers. These standards are designed to guide school districts in the development of effective language arts curricula that include extensive opportunities for students to read, write, communicate, and inquire. These standards are not intended to be taught discretely in a predetermined order, nor are they prescriptions for a specific curriculum or type of instruction. Rather, they provide opportunities for innovation vital to teaching and learning. The standards are to be addressed frequently in a variety of ways with increasingly more difficult texts over extended periods of time to promote deeper understanding.

Many of the indicators related to media, viewing, and communication are embedded within the writing and researching standards and should be addressed through classroom instruction. Though standards including indicators that refer to viewing and media literacy are not tested on state assessments, these skills are crucial to the quality

of life in a society permeated by media. Technology and media have a critical place in classroom instruction. The skills needed by students to navigate their visual culture, similar to those of traditional print literacy, are as important as reading and writing.

Teachers and administrators make informed and effective curricular and instructional decisions about nurturing their students as readers, writers, and communicators. While ELA teachers are responsible for their own body of content, many of these academic standards are tools for lifelong learning that all teachers should integrate on a regular basis. Rigorous application of reading, writing, speaking, listening, viewing, and researching belongs in all South Carolina classrooms.-

Guiding Principles

The following guiding principles—which are modeled after those enunciated by the state of Massachusetts in its *English Language Arts Curriculum Framework 2001* (published online at <http://www.doe.mass.edu/frameworks/current.html>)—are the philosophical foundation of South Carolina’s ELA academic standards and are intended to guide the construction and evaluation of all ELA curricula in the state.

Guiding Principle 1

An effective English language arts curriculum is framed within the context of a community of learners

Classrooms should be places of joyful learning where students have the opportunity to read, write, and converse in a nurturing environment that supports independent and collaborative learning. Teachers need to create spaces where learners come together as a community in which young people are encouraged to explore, take risks, and inquire about their world. Students need to be able to let teachers know who they are and to share the different perspectives they bring into the classroom. In such a context, students can learn about their classmates as individuals who each have unique ideas and talents to contribute.

Guiding Principle 2

Learning in English language arts is recursive.

Students at every grade level apply similar skills and strategies as they read increasingly more complex texts. Many reading and writing strategies do not change, but the difficulty and complexity of the texts provide the differentiation. As these skills and strategies are addressed frequently and over extended periods of time, students can come to acquire a deeper understanding and appreciation of more challenging texts, gaining sophistication as they grow as readers, writers, and learners.

Guiding Principle 3

Reading, writing, communication, and research are interdependent.

Reading, writing, speaking, listening, viewing, and researching are not discrete skills: each literacy strand intertwines with and supports the others, creating a tapestry of language. Effective use of language not only requires but extends students' thinking. As learners listen, view, discuss, or write, they engage in thought. Successful instruction is dependent upon the integration of the language arts with other content areas so that skills and concepts from multiple disciplines are woven together to support student learning. And when students undertake increasingly complex assignments that require them to communicate in response to what they are learning, they deepen their thinking about that topic.

Guiding Principle 4

An effective English language arts curriculum provides strategic and purposeful instruction in reading and writing.

Effective literacy instruction is explicit and systematic. It is intentional, based on assessed student needs, carried out in an organized manner, and clearly communicated to students. Quality instruction is responsive and authentic, connecting to student needs and relating to real-world purposes. Students at all levels—elementary, middle, and high school—need varied opportunities for reading, writing, listening, and speaking. Read-alouds, shared reading, and independent reading and writing experiences as well as reading and writing conferences, literature discussion groups, and strategy-based mini-lessons are all important instructional activities.

Guiding Principle 5

Oral language and expression is foundational to literacy learning and development.

Children develop oral language and literacy through appropriately challenging learning, and they need many opportunities to speak and listen. As they grow in vocabulary and concept development, they increase in their ability to use language to convey meaning. In view of the fact that written and spoken language develop together, it is vitally important that students be exposed to a language- and print-rich environment.

Students need to be given opportunities to participate in the kind of collaboration and discussion that arises out of meaningful contexts and experiences. They develop their understanding of graphic, textual, and structural features of print through exposure to nonfiction, fiction, poetry, and drama. In the primary grades, students progress from oral to written language. As they listen to stories read aloud, primary students develop

comprehension and fluency. Beyond the primary grades, students continue to refine their use of oral language and their level of literacy through speaking and listening.

Guiding Principle 6

An effective English language arts curriculum uses literature from a variety of cultures and eras.

Students should be given a broad exposure to classic and contemporary literary works representing cultures within the United States and throughout the world. Reading provides a bridge to other times and places, allowing students to experience not only the world around them but also the worlds of ages past. Literature provides a landscape that helps shape who children are and where they want to go. The power of literature shows us that anything is possible. Students must have time to read within the school day, and they must be given choices among the texts that they will read. Collaboration among teachers, school media specialists, and local librarians is critical in matching books to readers. In order to foster a love of reading, teachers need to encourage independent reading within and outside of class.

Guiding Principle 7

An effective English language arts curriculum emphasizes writing as a centerpiece of the school curriculum.

Writing is thinking. As students write, they are engaged in a recursive process of critical, analytical, and reflective thinking. In order to learn to write well, students must write often and write for a variety of purposes. They need opportunities to study the craft of writing by reading the works of others and seeing models of quality texts. Students must learn to “read like writers” and “write like readers.” Common expectations about writing are developed across the curriculum. Teachers in all content areas must provide students with the opportunity to write every day, both in and out of school. As students begin to write cohesively about increasingly more sophisticated concepts and ideas, their writing helps to ensure their academic success.

Guiding Principle 8

An effective English language arts curriculum utilizes all forms of media to prepare students to live in an information-rich society.

In today's dynamic society, all forms of mass media are used to inform and persuade. Proficient students apply critical techniques to evaluate the validity of the information they encounter. In a culture where persuasive and invasive media messages abound, students need to think critically about what they read, hear, and view. The challenge for students is to respond to these media messages personally, critically, and creatively.

The inclusion of media literacy in South Carolina's academic standards recognizes the powerful force of mass media in the twenty-first century.

Today's emerging technologies include many multimedia devices and programs that depend on the appropriate application of technology and thus require media literacy skills: digital photography, DVDs, CD-ROMs, high-definition digital television, Internet streaming, MP3 players, nonlinear (computer/video) editing, PDAs (personal digital assistants), PowerPoint presentations, blogs (Weblogs), and more.

The skills of critical inquiry—the ability to question and analyze a message, whether it be textual, visual, auditory, or a combination of these—are a crucial element in literacy instruction. The production of visual media is also a crucial element, enabling students to acquire and demonstrate an understanding of advertising, aesthetic techniques, audience, bias, propaganda, and intellectual purpose. Integrating into the ELA curriculum the vocabulary and skills associated with media presentations helps students develop lifelong habits of critical thinking.

Guiding Principle 9

An effective English language arts curriculum emphasizes informational text that is relevant to our increasingly complex and technological world.

Today's students are confronted with unprecedented amounts of information in a wide variety of print and nonprint forms. The ability to locate and use information effectively is an essential skill in the modern world. In many instances, information comes in unfiltered formats. Consumers of information must raise questions about the authenticity and reliability of sources. Now, more than ever, students need to be prepared to comprehend, analyze, and challenge what they read, hear, and see before making assumptions about its validity. Real-world texts are an integral and vital part of the ELA curriculum.

Guiding Principle 10

An effective English language arts curriculum teaches the strategies necessary for independent learning.

The purpose of education is to create individuals who are independent learners and thinkers. Students should be encouraged to equip themselves with learning strategies that they will practice intentionally and apply strategically. As contexts become more complex and challenging, students should be able to use such strategies with purpose and success. When they are able to determine their own learning strategies and to use those that work best for them, students become independent learners; as they become independent thinkers, they are free to pursue a lifetime of learning.

Learning to Read

Standard K-3 The student will learn to read by applying appropriate skills and strategies.

Indicators for this standard in kindergarten through grade two focus on beginning reading skills and strategies and support the five components—comprehension, fluency, phonemic awareness, phonics, and vocabulary—delineated by the National Reading Panel as central to a child’s learning to read. Although the phonics and phonemic awareness indicators are separated, the National Reading Panel found that the most effective way of teaching phonemic awareness is in conjunction with phonics.

These indicators will be assessed by the classroom teacher.

High-Frequency Words

High-frequency words, often times referred to as sight words, are words that students encounter frequently in reading and writing. It is critical that readers and writers develop automatic recognition of these words. Comprehension begins to break down when students focus on trying to decode or sound out individual words. Learning to recognize high-frequency words by sight is critical to developing fluency in reading.

Some high-frequency words do not follow regular phonetic rules. They do not follow easy spelling patterns. For example, the words *cave*, *Dave*, *save*, *wave*, and *gave* follow the vowel-consonant-silent e pattern but the word *have* does not. Asking students to "sound out" words such as these may cause increased frustration for struggling readers. In order for students to remember words and for them to become automatic, they need many opportunities to experience and manipulate them.

Much of the English language has been adapted from other languages during its development. One sixth of English words survived from old English and almost all of those words are high-frequency words. High-frequency words are often classified in one of three groups. They may be

- non-phonetic words—those needing to be recognized by sight because they can't be sounded out (e.g., was, through).
- frequently occurring words—those needing to be recognized easily because they occur so often.
- high-interest words—those recognized by sight because they have special interest and/or emotional overtones for a child (e.g., mom, dad, love, birthday, McDonald's, Target, dinosaur, etc.).

When students have a thorough understanding and mastery of high-frequency or sight words, independent reading typically improves because this knowledge

- enables students to use context clues,
- increases students fluency and ease of reading,
- enables students to read greater amounts of material and for longer periods of time, and
- allows students to focus on comprehension of a text rather than on the decoding of individual words.

HIGH FREQUENCY WORDS CHART

In addition to these lists, words related to student interests (e.g., Nintendo, Barbie) or surroundings such as names of family members, friends, familiar places (e.g., McDonald's, BiLo) or things (e.g., Cheerios, HiC) should be included in a student's high-frequency or sight word vocabulary. Vocabulary used in the currently adopted reading series should also be added to these lists.

These word lists should not be memorized or taught in isolation. High-frequency or sight words are developed through extensive exposure to texts and a student's surroundings. High-frequency words should be recognized and read automatically. Students should remember and use the high frequency words previously learned.

Greek and Latin Roots and Affixes

A study of Greek and Latin roots and affixes provides students with an understanding of word parts so that they can determine the meaning of unfamiliar words thereby increasing their spoken and written vocabulary. The study of word parts should not be done in isolation by having student's memorize lists of roots and affixes. Rather teachers should immerse students in rich oral and written language, fostering an interest of how words are developed and their meanings thus fostering an interest in vocabulary exploration. Students should remember and use roots and affixes previously learned.

Stages of Spelling Development

According to research, children learn to spell in two distinct developmental stages. In phase 1, the learning to spell stage, the learner begins to develop a dictionary in his head. This phase, also called the alphabetic learning principal, usually takes the child about two years to develop. In the second phase, correct and automatic spelling, more specific word knowledge must be learned. During this phase, children concentrate on learning spelling patterns and they fine tune their knowledge of how words work while they grow in the number of words they can spell automatically and accurately. This phase usually lasts from second grade to sixth or eighth grade.

Phase I. Learning to Spell			
Gentry's Levels of Writing	Gentry's Stages of Developmental Spelling	Spelling Curriculum to be Taught	Expected Competency

Level 1 Writing: Use of letters with no matches to sound	Precommunicative Spelling	Use of techniques leading inventive spellers to Stage 2, plus a few correct spellings gleaned from writing	Beginning to middle of kindergarten
Level 2 Writing: Use of partial sound-letter matches	Semiphonetic Spelling	Use of techniques leading inventive spellers to Stage 3, plus a few correct spellings gleaned from writing	Middle to end of kindergarten
Level 3 Writing: Use of one letter for each sound`	Phonetic Spelling	Use of techniques leading inventive spellers to Level 4, plus a few a correct spellings gleaned from writing; correct spelling of some high frequency word families; the first grade corpus	Beginning to middle of first grade
Level 4 Writing: Use of chunks of phonics patterns	Transitional Spelling	Completion of first grade corpus, including correct spelling of CVC short-vowel patterns and some CVCe long-vowel patterns	Middle to end of first grade
